

WHIRLWASH - RI

LIQUID CONCENTRATE RUST INHIBITOR

WhirlWash-RI is a biodegradable, non-hazardous, liquid inorganic rust inhibitor for the protection of steel, iron and yellow metal parts.

WHIRLWASH - RI

- ▶ Provides rust protection for short-term storage after cleaning or mass finishing of iron, steel, or yellow metal parts.
- ▶ Provides in-process rust protection to iron, steel or yellow metal parts and to steel media during deburring operations.
- ▶ Creates no undissolved particles to pack into holes or crevices, or to plug spray nozzles or drain systems.
- ▶ Is concentrated for protection at low cost, low use levels.
- ▶ Requires very low usage amounts.

Use Instructions

Use in the rinse after cleaning, deburring, descaling, or burnishing.

Add WhirlWash-RI to rinse to produce 0.5% in the rinse water. Follow the equipment manufacturer's recommendations as to how to apply additives to the rinse.

Technical Data

Form	Liquid
pH (use dilution)	9 +/- 1
Color	Light Amber
Rinseability	Excellent
