

WHIRLWASH-P

Multi-Metal Power Spray Wash Cleaner

WHIRLWASH-P is a long-lasting, non-hazardous, biodegradable, rust-inhibited alkaline powdered concentrate specially formulated for the rapid and safe removal of mill oils, heavy greases, lubricants, carbon and dirt soils from multi-metals in automatic parts washers. *Safe on steel, iron, aluminum and other sensitive metals, rubber & plastic.*

Applications

Quickly removes grease, oils, carbon, cutting and forming lubricants and other soils.

- Performs well at lower temperatures (140°F) for very cost-effective cleaning
- Long bath life and minimal concentrations provide exceptional value with low overall use costs.

Provides operator safety, will not erupt when mixed in hot water like caustic-based products.

- Will not build excess foam in spray cabinets at normal operating temperatures (above 140°F).
- Contains no silicone to interfere with new coatings or paint.
- Low-odor and de-dusted for operator comfort

Instructions

Designed for use in hot spray pressure cabinet systems and conveyor-type washing equipment. Operate equipment according to manufacturer's instructions.

For Light to Medium Duty Cleaning: Use ½ to 4 oz. of concentrate per gallon of system water.

For Heavy Duty Cleaning: Use 5 to 9 ounces of concentrate per gallon of system water.

WHIRLWASH-P mixes readily and may be added to an opened tank of hot water agitation. It will not erupt in hot water like other caustic-based products.

Solution temperature operating range is from 140F to 190F with typical cleaning times of 5 to 30 minutes.

If possible, rinse parts thoroughly after washing to prevent any residue.

To maintain correct product concentration levels, use the WHIRLWASH-P Titration Test Kit.

QUANTITY

LBS.

Technical Data

Form Granular Solid
Color White
pH (when diluted for use) 11.5 to 12.5
Rinseability Excellent

SAMPLE

FOR INDUSTRIAL
USE ONLY.
PROPERLY DISPOSE
OF EMPTY
CONTAINER.
